

**16TH CONFERENCE OF  
THE OIE REGIONAL COMMISSION  
FOR THE MIDDLE EAST**

**3-4 NOVEMBER 2021**

# Tripartite Activities on AMR

Dr Rebecca Hibbard

Project Officer

**Antimicrobial Resistance and Veterinary Products Department**

**16TH CONFERENCE OF  
THE OIE REGIONAL COMMISSION  
FOR THE MIDDLE EAST**

**3-4 NOVEMBER 2021**

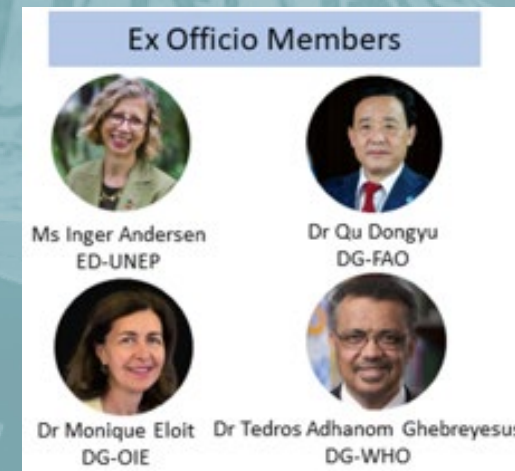

# Tripartite Activities on AMR

1. Global Governance Structures
  - GLG
  - Partnership Platform
2. Tripartite Strategic Framework on AMR
3. Multi-Partner Trust Fund on AMR
4. One Health Global Plan of Action

# Global Leaders Group

- Performs an independent global advisory and advocacy role with the objective of maintaining urgency, public support, political momentum and visibility of the AMR challenge on the global agenda
- Established based on the recommendation of the IACG in 2019 – has since held 3 meetings
- Preparation of statements and information notes
  - *Antimicrobial Use in Food Systems (August 2021)*
  - *Code of Practice to minimize and contain foodborne antimicrobial resistance (October 2021)*
  - *Financing to address antimicrobial resistance*
  - *Surveillance of antimicrobial resistance and use*

**16TH CONFERENCE OF THE OIE REGIONAL COMMISSION FOR THE MIDDLE EAST | 3-4 NOVEMBER 2021**

# Multi-Stakeholder Partnership Platform on Action against AMR

**Purpose:** To bring stakeholders across the human, animal, plant, and environment interface together, in order to preserve antimicrobials as lifesaving medicines across all sectors.

- **Inclusive, international platform at the forefront of efforts to implement the Global Action Plan on AMR by:**
  - Strengthening a shared global vision on AMR
  - Providing a venue for information sharing and networking
  - Instigating action to reduce the impact of AMR
- **Online survey to collect feedback across regions, sectors and stakeholders**
  - **> 670 responses – 93% positive**

**16TH CONFERENCE OF THE OIE REGIONAL COMMISSION FOR THE MIDDLE EAST | 3-4 NOVEMBER 2021**

# Tripartite & UNEP Strategic Framework on AMR

- **Reflects the joint work of the Tripartite partners to advance a One Health response to AMR:**
  - Presents the background and context for the collaboration between the Tripartite organisations and the Tripartite and UNEP
  - Describes the comparative advantage and catalytic role of the Tripartite in the One Health response to AMR
  - Presents a theory of change for the period 2022 to 2026
- Underpins a two-year Workplan 2022-2023
- Launch now foreseen end of 2021/Jan 2022
- **UNEP engaged in the Tripartite collaboration**

**Goal:** To preserve antimicrobial efficacy and ensure sustainable and equitable access to antimicrobials for responsible and prudent use in human, animal and plant health contributing to achieving the SDGs

**Objective 1:** Optimize the production and use of antimicrobials along the whole life cycle from research and development to disposal

**Objective 2:** Decrease the incidence of infection in humans, animals and plants to reduce the development and spread of AMR

**Impact:** Countries have the capacity to design and sustainably implement evidence-informed One Health responses to AMR

**Outcome 1:** Policy and law support effective country-owned One Health AMR responses

- Countries have the capacity to ensure policy coherence across sectors.
- Countries recognise AMR as a priority in the broader development agenda, acknowledging the need for sector-specific and joint action from all AMR-related sectors.
- Countries have the capacity to identify and strengthen their AMR-relevant legislation and regulation aligned with international standards/policies.
- Countries have the capacity to consider, research and analyze the effects of the incentives and disincentives of legal regulation when designing laws and policies.

**Outcome 2:** Systems and structures, including institutional capacities, are in place to support effective implementation of country-owned AMR responses

- National action plans on AMR regularly updated and national AMR multisectoral coordinating mechanisms strengthened.
- Access to good-quality antimicrobials strengthened for all sectors.
- Guidelines up to date and implemented to encourage responsible and prudent use measures across all sectors.
- Monitoring and surveillance of AMR and AMU are undertaken.
- Strategies employed to prevent and detect infection in humans, animals, and plants and to reduce food safety risks.

**Outcome 3:** Increased, sustained resourcing is in place for country-owned One Health AMR responses

- National action plans on AMR, representative of all sectors, are prioritised and resourced.
- Priority actions from national action plans on AMR mainstreamed into national plans and budgets.

**Intermediate outcome 1:** With Tripartite support, country-owned, sustainable One Health governance ensures effective and balanced national AMR responses

Multisector coordination facilitates a **One Health approach to AMR and understanding of its drivers**

Effective multistakeholder coordination underpins **AMR responses** through AMR national action plans

**Intermediate outcome 2:** The global response to AMR is supported through effective Tripartite leadership and coordination, working through constituencies and Members to influence global investment and scale up of actions on AMR

**Demonstrated political engagement and resourcing**

- Increased resourcing for sustained joint One Health and sector-specific AMR responses.
- AMR included in the development agenda with increased activity and scale up by international financial institutions and development organisations.
- Strengthened, long-term commitment to joint One Health and sector-specific AMR responses, including in international and regional political and economic fora.

**Output 1:** The capacity and knowledge of countries are strengthened to prioritise and implement context-specific collaborative One Health work to control AMR in policies, legislation, and practice

Tripartite functions

1.1 One Health technical support and capacity development

1.3 Convening, advising and advocacy

1.2 Development of technical standards and guidelines

1.4 Impact assessments

1.5 M&E

**Output 2.1:** Global and regional initiatives and programmes influence and support One Health responses to AMR

- Tripartite global and regional action and mechanisms strengthened.
- Tripartite Joint Secretariat on AMR resourced and functions effectively to support coordinated action.
- Global guidance on AMR provided and regularly updated.
- AMR Multi-Partner Trust Fund scaled-up to maximise impact of investments.
- Global and regional partnerships in place to strengthen effectiveness of the multisectoral AMR response.
- Advocacy on AMR strengthened and coordinated.
- One Health research & development and innovation agenda on AMR shaped.

**Output 2.2:** Global Governance structures are established, resourced and function effectively

- Global Leaders Group
- Independent Panel on Evidence for Action on AMR
- Partnership Platform for Action on AMR

**16TH CONFERENCE OF THE OIE REGIONAL COMMISSION FOR THE MIDDLE EAST | 3-4 NOVEMBER 2021**

Applied to GAP pillars

Awareness & behaviour change

Surveillance & research

Prevention of infections

Optimised use

Research & sustainable investment

Governance

# AMR Multi-Partner Trust Fund

- Mechanism to secure consistent and coordinated development financing to support One Health National Action Plans and Tripartite Workplans.
- Set up for an initial five-year period (2019-2024)

## The way forward:

- Extend the MPTF from 2024 to 2030
- No cost extension of projects
- Participation of UNEP in the AMR MPTF Country proposals
- Broadening of resourcing

# AMR MPTF – Global Projects

PROJECT	DETAILS	IMPLEMENTING PARTNER
<b>TISSA proposal</b>	Developing, populating and publicizing the TISSA platform – a global web-based repository on published AMR & AMU data from FAO, OIE and WHO across human, animal, plant, food systems, and environmental sectors	<b>WHO</b>
<b>Monitoring and Evaluation</b>	<p>Technical advisory service for country-level multisectoral monitoring and evaluation of NAPs implementation</p> <p>Global-level monitoring and aggregation of indicator data at sectoral level</p> <p>Tripartite biennial global reporting on AMR under the GAP M&amp;E framework and annual reporting of Tripartite AMR country self-assessment survey (TrACCS) results</p>	<b>OIE</b>
<b>Legal and regulatory frameworks</b>	<p>Development of a Tripartite One Health Assessment Tool for AMR-relevant legislation</p> <p>Finalizing, piloting and validating the tool</p>	<b>FAO</b>
<b>Environment</b>	<p>Strategic global-level governance advocacy initiatives on AMR</p> <p>Improved countries' capacities for designing and implementing AMR-related policy frameworks, investment plans and programmes</p> <p>Engagement with critical stakeholders' groups</p>	<b>FAO</b>
