

Applied public-private partnership (PPP) to FAST diseases control

Shahin Baiomy

European Commission for the Control of Foot-and-Mouth Disease

GF-TADs Consultative Seminar on Progress Made in the FMD and PPR Regional Roadmap for East Mediterranean
Countries 11-13 September 2022

Background

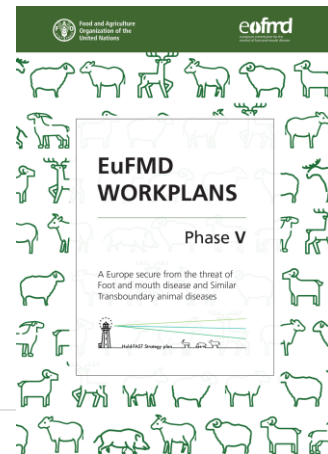

What is FAST?

Foot-and-mouth and Similar Transboundary animal Diseases (EuFMD Workplan)

→ *FMD, PPR, SGP, LSD, RVF*

What is PPP?

Public-private partnerships are a joint approach in which the public and private sectors agree responsibilities and share resources and risks to achieve common objectives that deliver benefits in a sustainable manner.

Context - Global FMD Control Strategy

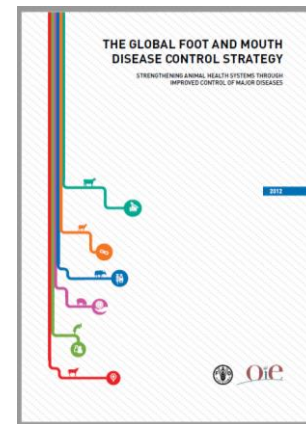

... other elements to support TAD control will become increasingly important when progressing through the FMD-PCP Stages, including ... development of public-private partnerships

Examples:

- boost worldwide **vaccine production**
- strong links between the public sector and the private sectors have been shown invaluable for countries facing **emergency disease situations**
- Developing PPP that ensure that livestock owners are involved in **surveillance and control** initiatives.

→ the private sector is one of the pillars of the WOA standard on good governance

→ Strengthening & training needed

Context - EuFMD workplan (phase V)

Pillar II

Improved national FAST control plans, networks and regular co-ordination with Gf-TADs partners and international agencies

Promotion of public-private partnerships (PPP) for FAST monitoring and control and development of new partnerships

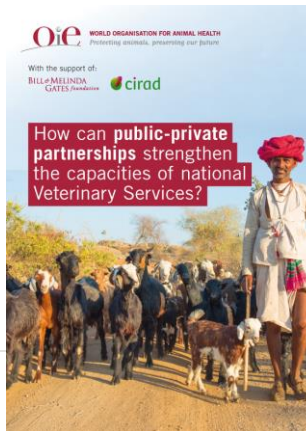

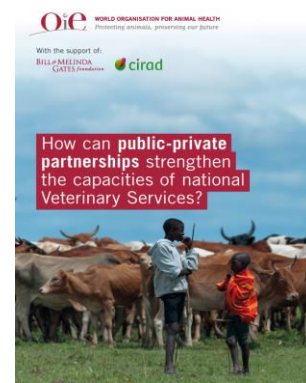

→ Improved engagement with private sector (including private veterinarians, training providers and vaccine producers) in line with PCP and PPP principles

Context - WOAH

- **WOAH key strategic priority:** ensuring the capacity and sustainability of Veterinary Services (ref. WOAH 6th Strategic Plan – 2016-2020)
- **WOAH objective:** to support its members to develop sustainable PPPs to strengthen Veterinary Services

WOAH PPP initiatives

- **2016:** WOAHA began a 3-year initiative on PPPs, in collaboration with the French Research Institute for Agricultural Development (CIRAD); funded by the Bill & Melinda Gates Foundation.
- **2017:** Resolution #39 at WOAHA 85thGS; and an online survey of public and private partners: 97 PPP success stories from 76 countries.
- **2018:** Brochure and typology released at 86thGS; Expert consultation, with 42 international public and private experts PPP impact assessment on case examples.
- **2019:** The «WOAH PPP Handbook» of guidelines released at the 87thGS; E-learning modules; 4 joint regional workshops in Africa and Asia to disseminate guidelines; PPP is integrated into PVS Pathway as targeted support activities.
- **2020:** A PPP-FAST virtual course. (jointly with EuFMD)
- **2021:** training WSs and supporting PPPs in a number of selected countries (Jointly with EuFMD).

Introductory course

Available as an open access course: <https://elearning-ppp.woah.int/>

Developed in partnership WOAH - EuFMD and released May 2019

A win-win situation

PPPs help to move from a no-win situation to a **win-win** situation for public and private sector partners.

By using resources and capacities of each of the public and private sector partners, PPPs help to move from an ineffective and/or inefficient situation which benefits nobody, to an effective and/or efficient system in which all partners derive benefits.

Section 1: PPP as a win-win strategy

Let's recap

PPP is defined as a joint approach in which the public and private sectors: (tick all that apply)

- Agree responsibilities.
- Share resources.
- Share risks.
- Achieve common objectives.
- Deliver benefits in a sustainable manner.

APPP-FAST course

PPPs: opportunities for progressive control of transboundary animal diseases: A case study on FMD control

Moving from “**what** might PPP offer” to “**how** could I implement PPP?”

<https://eufmdlearning.works/>

3 hour open access course
available on the WOAH e-
learning platform

Supplemented by discussion
fora, webinars and
assignments to form a **tutored
in- depth course** on EuFMD
platform

Target audience

- Countries not free of FMD (PCP-FMD 0-3)
- Executive and implementer levels
- Public and private sectors

EuFMD's ongoing PPP activities

- **Fostering and coordinating PPP initiatives in the EuFMD's countries of focus** has been embedded in the EuFMD workplan. As such, three main PPP projects are facilitated and technically supported by the EuFMD:
 - **South-East Europe (Iran):** this PPP initiative is focused on implementing Foot-and-Mouth Disease post-vaccination monitoring (PVM)
 - **North Africa (Algeria):** focused on PPPs supporting sero-surveillance activities of FAST disease control.
 - **Middle East (Sudan):** focused on possible PPPs for reducing FAST disease transmission risk during exporting live animals from Sudan to the Gulf region.
- **Training for Veterinary Paraprofessionals (VPP)** supporting them in delivering essential animal health services for smallholder farmers (SHFS); in partnership with Health for animals and World Veterinary Association.

EuFMD model for APPP to FAST diseases control in Sudan

Online course
on PPP

Consultation
meeting with
Key persons

Exchange ideas and discuss potential and feasible PPP initiatives in Sudan;

Existing areas of collaboration :

- Importation of vaccines;
- Immunogenicity studies;
- Ongoing initiative of producing FMD vaccine in Sudan;
- Infrastructure for export (establishing quarantine stations and Slaughterhouses)

Consultation
meeting with
Key persons

In-depth
hybrid
workshop

Main areas for potential PPPs in Sudan

- PPPs applied to **pastoralist systems**: e.g. training & empowering community animal health workers & veterinary paraprofessionals, grazing density and feeding issues, etc.
- **Vaccine security**
- **Export of live animals and animal products** (red meat) from Sudan to the countries in the region: Improving surveillance, diagnostics, quarantine and other services
- **Camel and horse health and export issues.**
- **Risk analysis and surveillance for HPAI in poultry sector**

PPP working
group

Pilot project on PPP applied to export of live animals and animal products from Sudan: strengthening surveillance

Area of surveillance

Main quarantine on the Red sea

CENTRAL VETERINARY RESEARCH LABORATORY
ANIMAL RESOURCES RESEARCH CORPORATION

CVRL

Conclusion

COME TO THE OPEN SESSION

26-28 October 2022

Hybrid event - Marseille (France)

OS22 focus

- / Emergency preparedness and Response
- / Risk Analysis and Modelling
- / Surveillance and Control
- / Virology and Diagnostics
- / Vaccines and Vaccination
- / Digital Learning for Veterinarians
