# Performance of Veterinary Services (PVS) Pathway

*A continuous process aiming to **sustainably** improve compliance of Veterinary Services and Aquatic Animal Health Services with international standards*

# The WOAAH Standards

## CODES

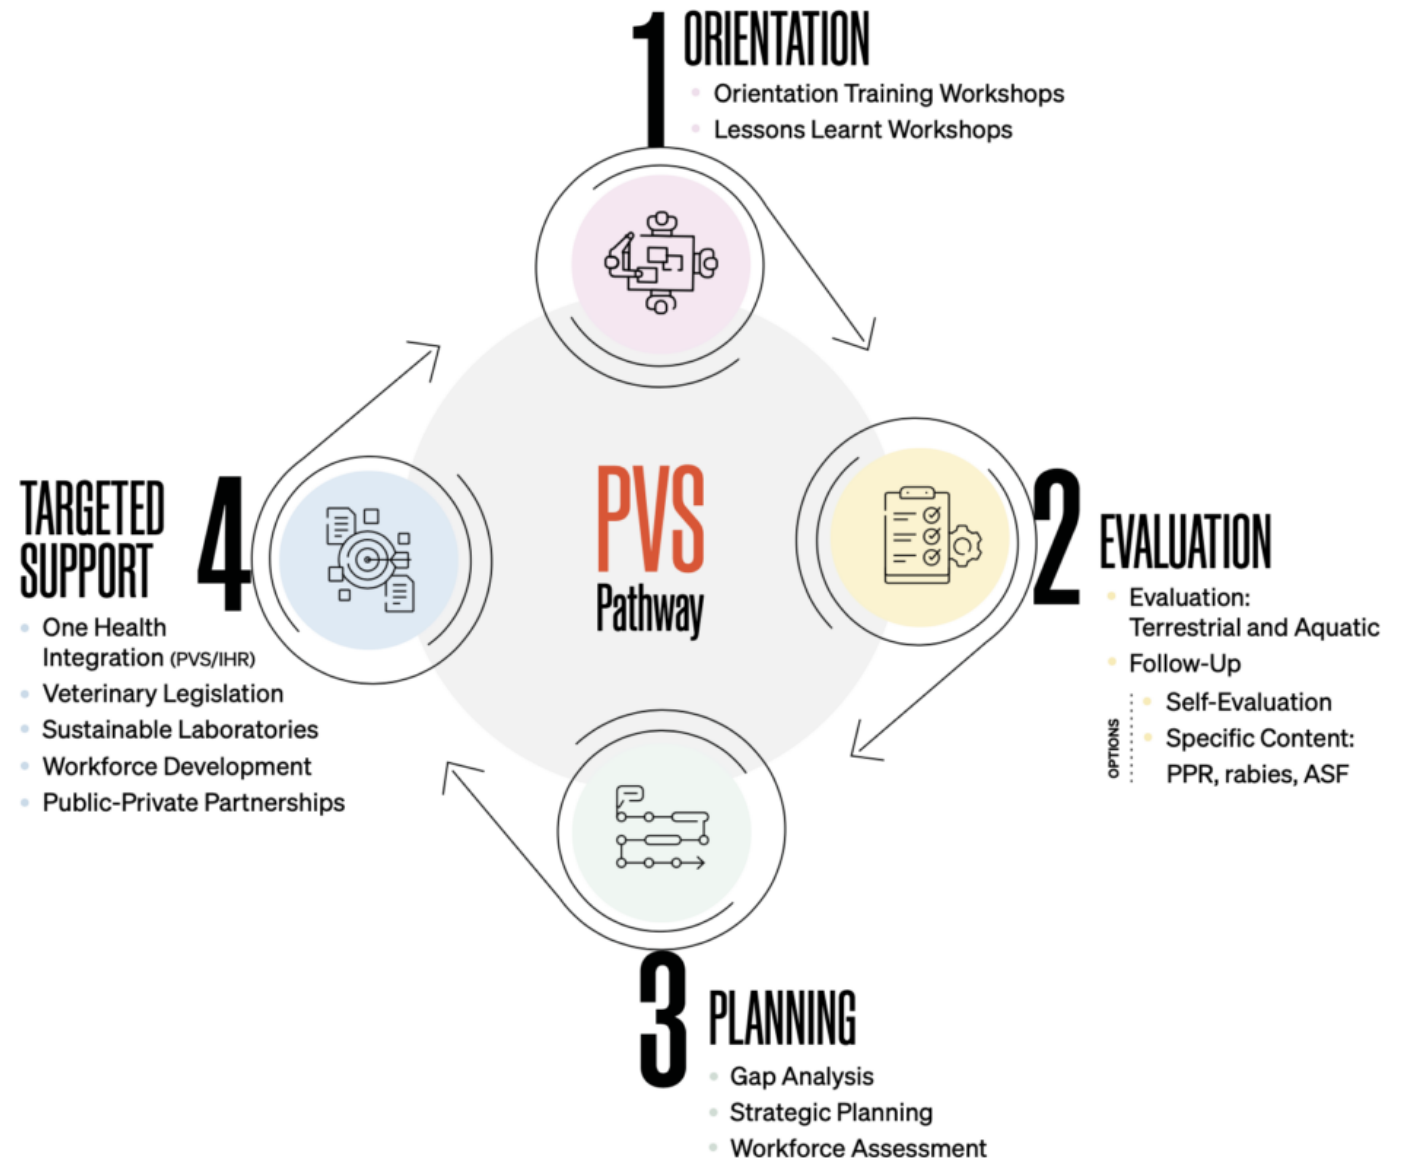

## MANUALS

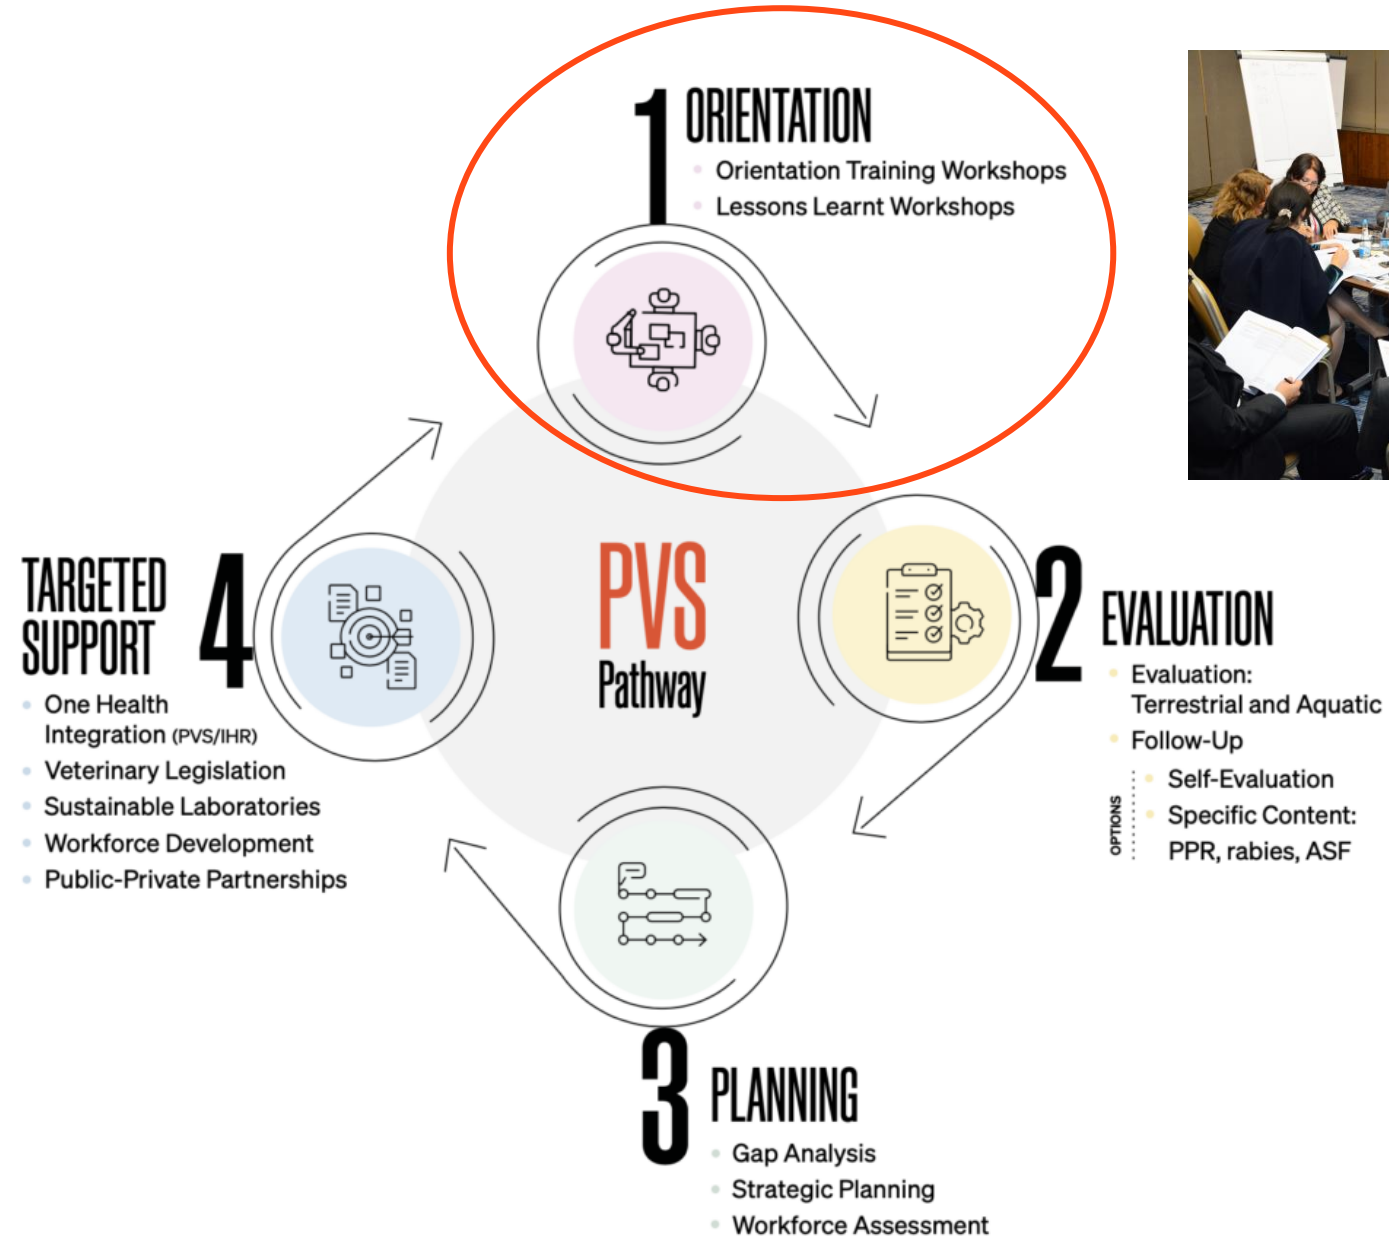

**Standards to improve animal health and welfare  
and veterinary public health**

# Performance of Veterinary Services (PVS) Pathway

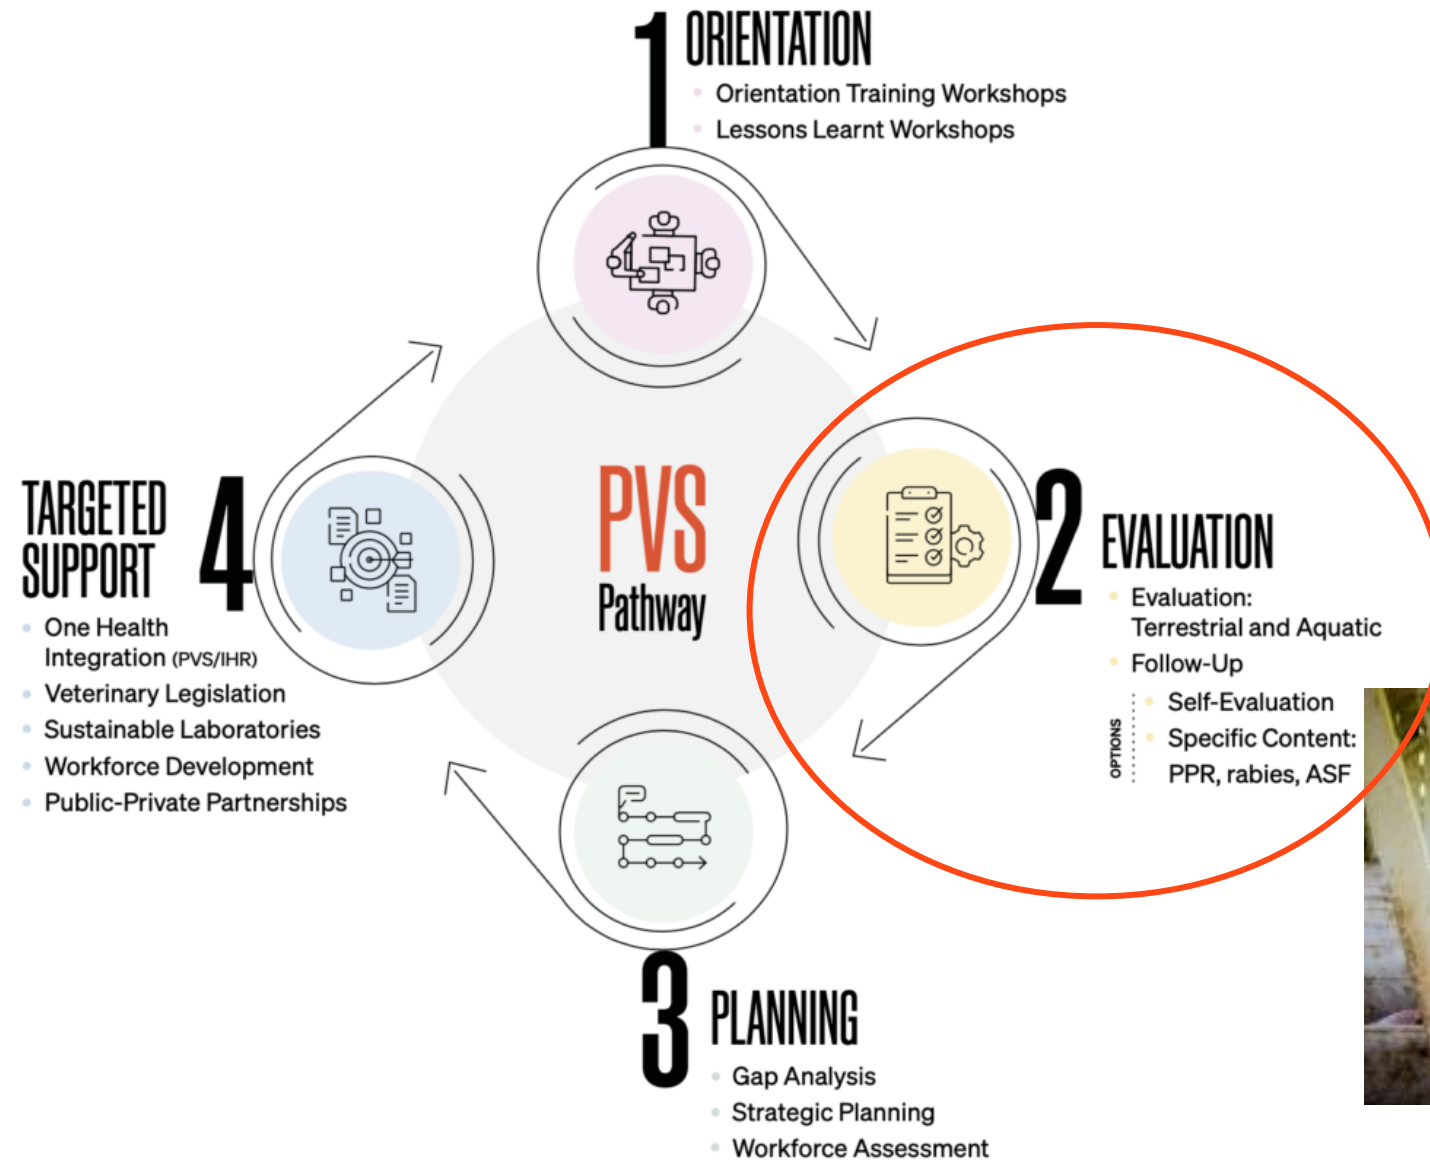

- Comprehensive, multi-staged process for **sustainable planning** and **improvement** of Veterinary Services' (VS) capacities
- Supports greater **compliance** with WOAHA International **Standards for** animal health and welfare
- Each step corresponds to specific **capacity-building** activities
- **Voluntary, country driven** process targeting internal systems and resources for sustainability
- **Strong uptake** – 146 countries, more than 650 reports

# 1. ORIENTATION

## 2. PVS EVALUATION

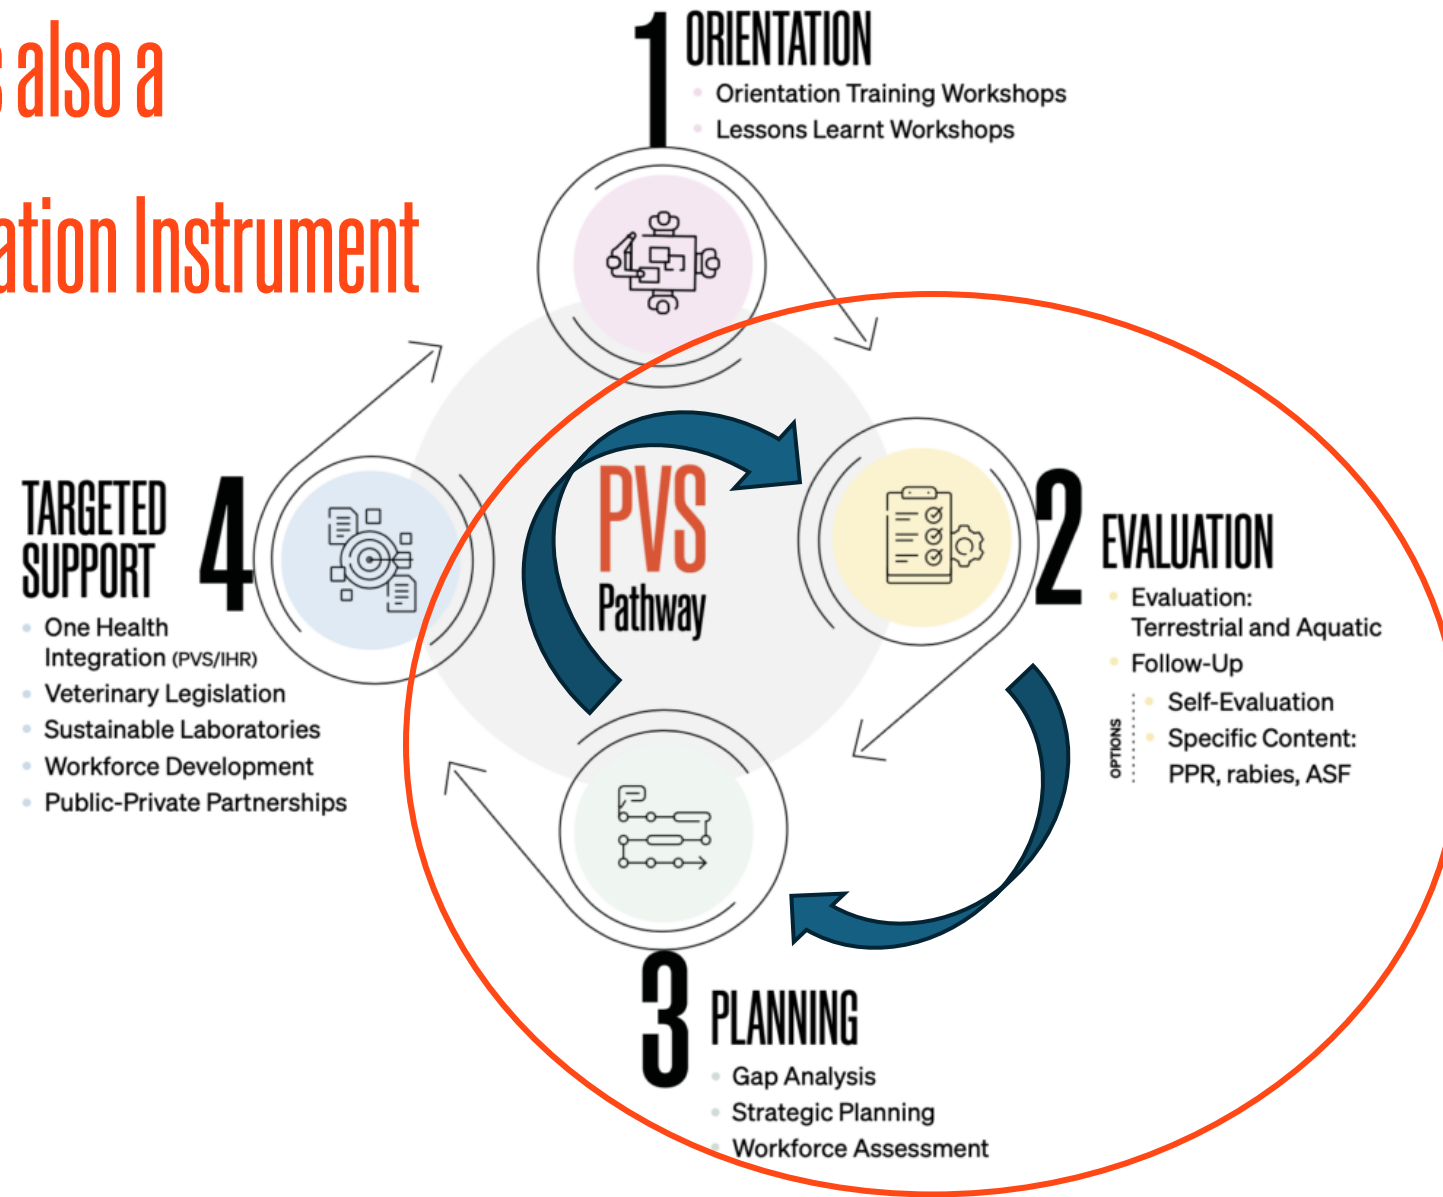

### 3. PLANNING

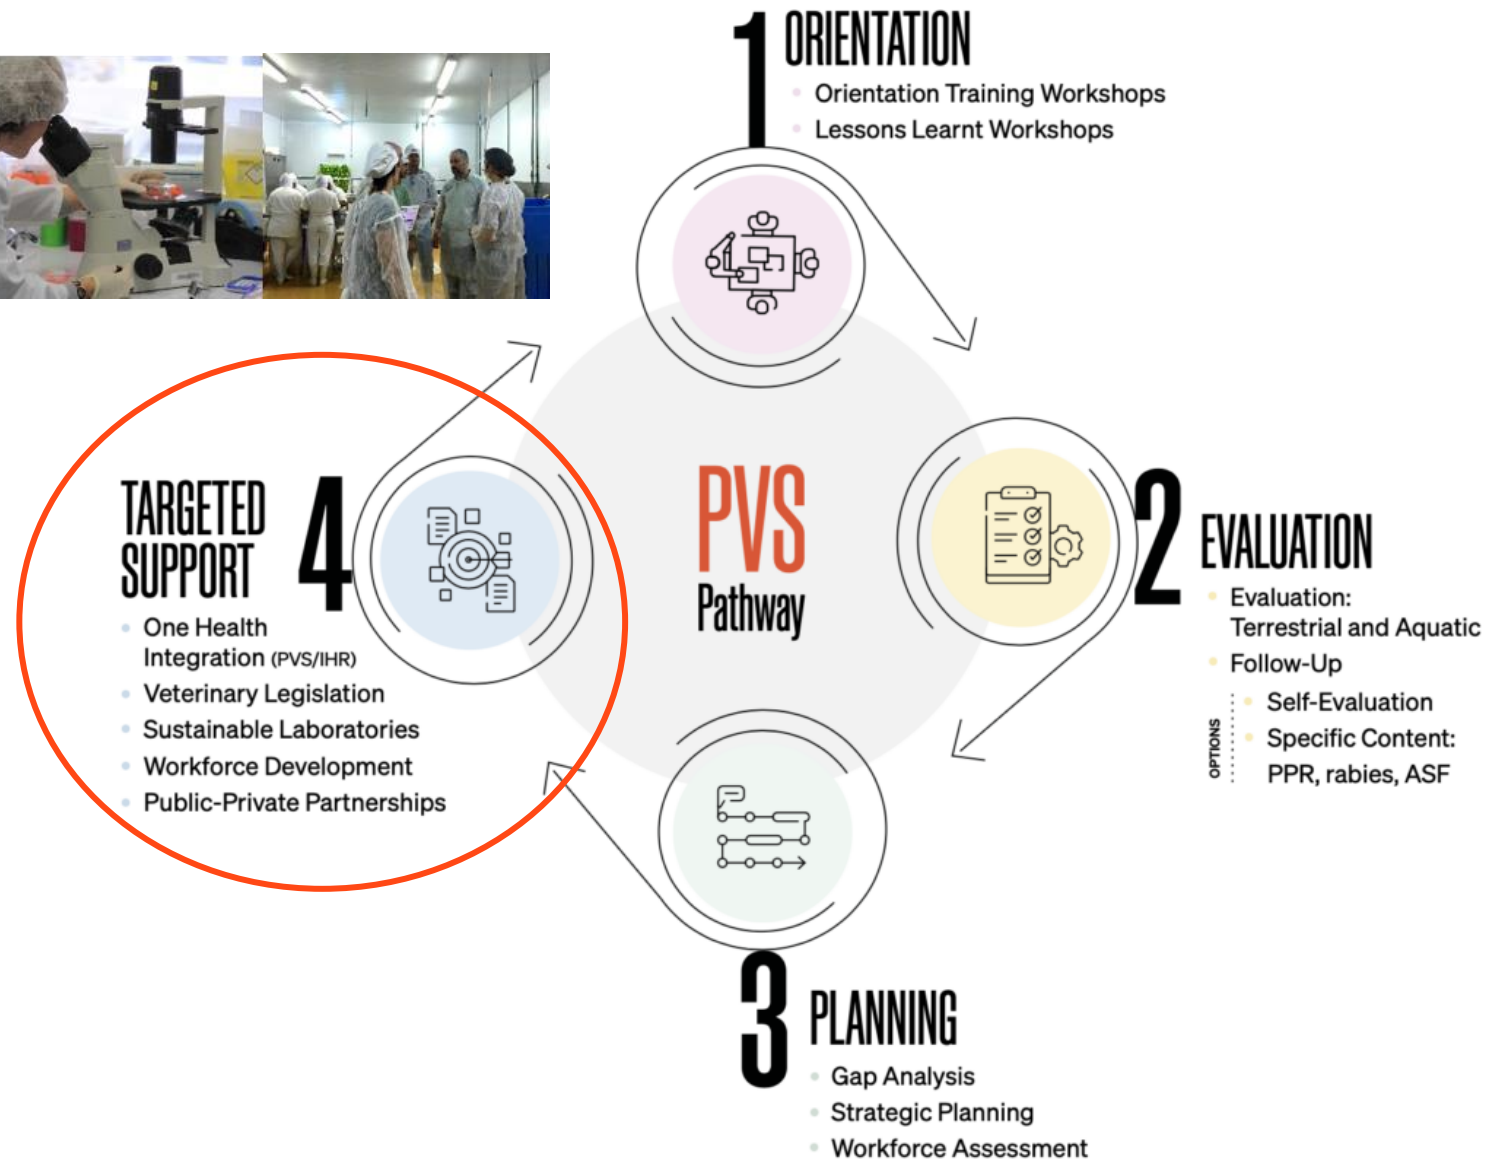

### 3. PLANNING

## The PVS Pathway is also a Monitoring & Evaluation Instrument

## 4. TARGETED SUPPORT

# PPR Specific content of the PVS Pathway

---

## *Global Strategy for the control and eradication of PPR (GCES)*

- A strategy was established in 2015:
- Control towards eradication of PPR by 2030
- **Reinforcing Veterinary Services**
- Improving animal health globally by reducing the impact of other major infectious diseases of Small ruminants.

# Global Strategy for the control and eradication of PPR (GCES)

## The GCES has three components:

- Component 1: PPR control and eradication
- Component 2: **Strengthening Veterinary Services**
- Component 3: Prevention and control of other major diseases of small ruminants

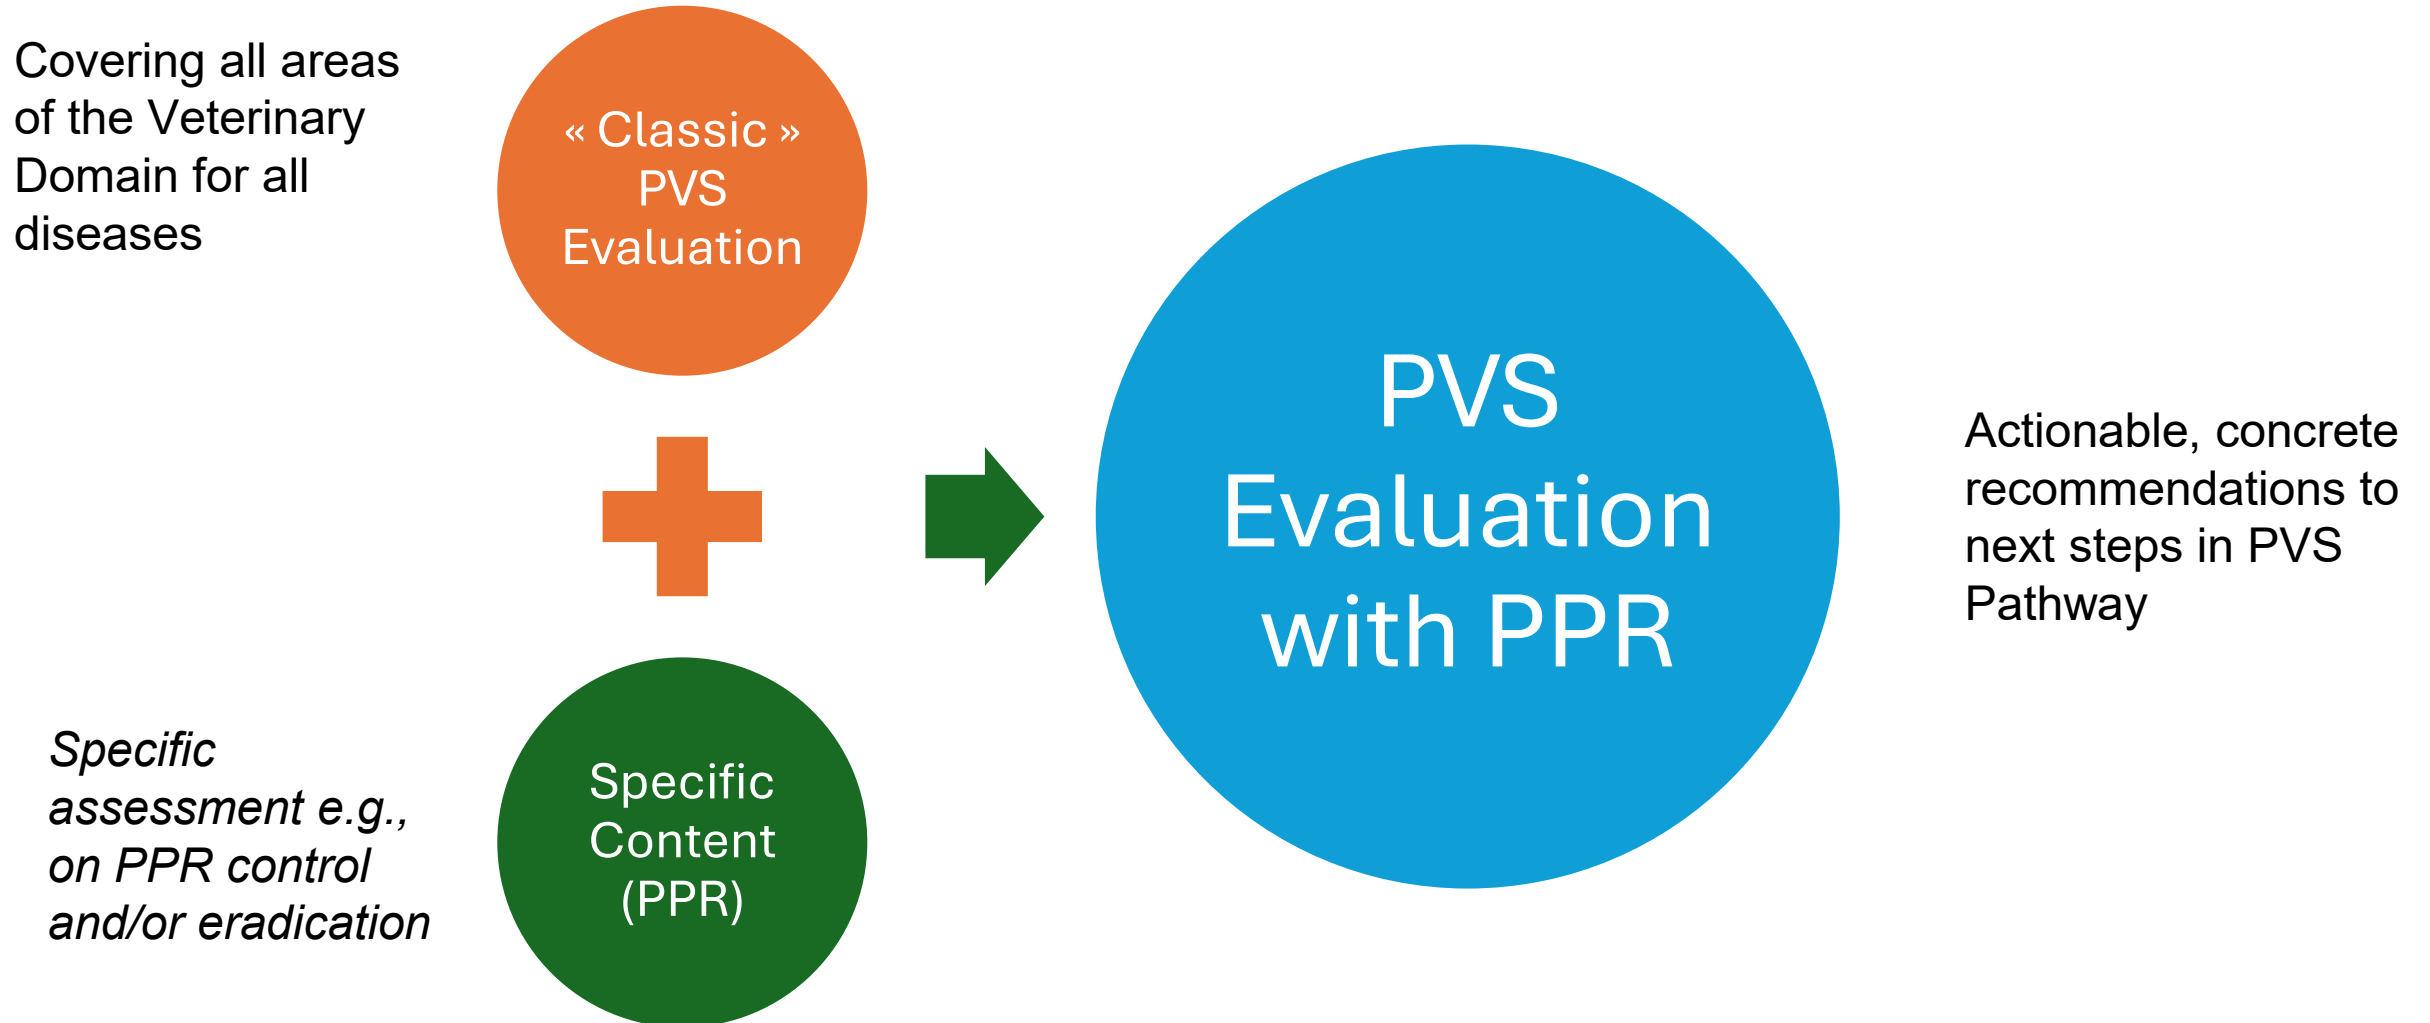

## Five-year programme to:

- ❑ Foundation for the eradication of PPR by reducing its prevalence in currently infected countries
- ❑ Capacity development in non-infected countries and application for PPR free status by WOA H
- ❑ **Strengthening national VS and their systems**
- ❑ Reducing the prevalence of other priority small ruminant diseases where appropriate

**Objective:** To help countries improve their prevention and control programmes via a ***systems approach***, building capacity in the ***transversal areas with significant coordination and specific targets***

“**Specific content**” approach focused on a **priority disease** - positive feed-back from WOA Member via many consultations

## PVS-PPR

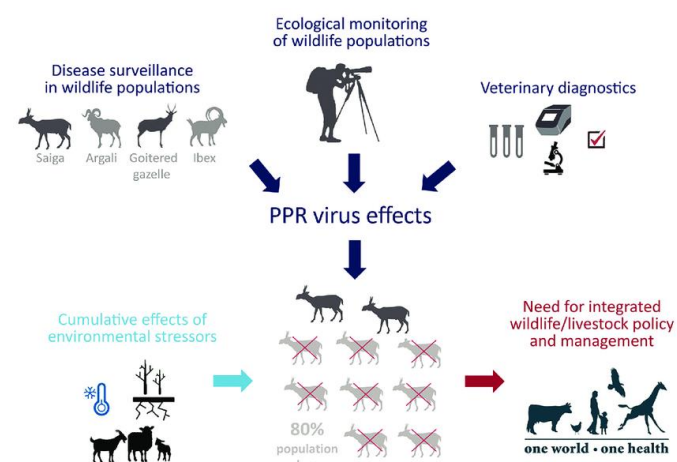

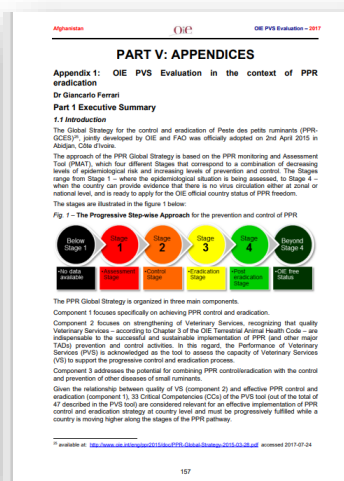

**Objective:** helping countries improve their PPR prevention and control programmes via a **systems approach**

- ✓ to support the implementation of the PPR national strategic plans
- ✓ to invite i Members to assess the capacity of the national Veterinary Services to control and eradicate PPR through participation in a specialized PVS Evaluation, focused on PPR

“**Classic**” PVS Evaluation/Follow Up  
(covering all areas of the veterinary domain and all diseases)

+

**Specific assessment on PPR control and/or eradication**

## PVS-PPR

- Methodology developed with FAO and PVS experts:
- PVS Tool/usual report + **Guiding Principles document/PPR Annex template**
- Includes a **PPR specialist** (good knowledge of new PMAT2 tool, the GCES and the current Global Eradication Programme (GEP) for 2022 – 2027) + other PVS experts
- Field visits + PPR specific day/s to make sure key stakeholders can be interviewed

### PVS tool Updates: **for the Good Governance of Veterinary Services**

- Assessment covers the broad veterinary domain
- Robust methodology based on the systematic review of 45 Critical Competencies (CC)
- In-country mission (2-6 weeks)
- Performed by WOAHP external experts in a collaborative way

#### Section 3 of Codes

Quality of Veterinary Services  
Quality of Aquatic Animal  
Health Services

## 4 Fundamental Components

- **PVS report – covers the 45 Critical Competencies (CCs)**
- **PPR Annex: 32/45 CCs relevant for PPR**
- **For each of the GCES Stages a certain set of CCs are relevant and for most of them, a minimum of LoA of 3 is required.**

(Generic) definition  
of the CC  
according to the  
WOAH PVS Tool

(Contextualized)  
definition of the CC  
in the context of  
the PVS-PPR

'Generic' level of advancement  
granted in the framework of the  
OIE PVS mission (March 2017)

<b>CC 1.1.A</b>	The appropriate staffing of the VS to allow <u>for veterinary and technical functions</u> to be undertaken efficiently and effectively	<b>3</b>
	The appropriate staffing of the VS to allow for <u>PPR prevention and control</u> to be undertaken efficiently and effectively	-
	<b>Level 3</b> [The majority of veterinary and other professional positions are occupied by appropriately qualified personnel at local (field) levels ( <u>for appropriate PPR prevention and control activities</u> )] <b>is required for Stage 2</b>	<b>X</b>

Required Level of advancement for  
this CC, to ensure minimum/  
sufficient capacity to prevent and  
control PPR, as stated in the GCES

Appreciation of the  
'contextualized' level of  
advancement in the  
context of the PVS-PPR

Indication if the  
required level is  
reached

- → the PPR LoA is less than the Generic LoA
- = → the PPR LoA is similar to the Generic LoA
- + → the PPR LoA is better than the Generic LoA

✓ reached

**X** not reached (in this  
case, recommendations  
provided should be  
implemented)

## **PVS-PPR**

- **Questions for consideration that may assist** (for guidance only - not to be included in report):
- *Is there sufficient veterinary staffing at national level, including for planning, management and supervision, to undertake PPR activities?*
- *Is there is a dedicated PPR National Control or Eradication Committee or equivalent, comprised mostly of veterinarians or other professionals?*
- *Is work on PPR specified in veterinarian job descriptions?*

## PVS-PPR mission

### Guiding Principles of an OIE PVS Evaluation mission (with PPR Global Eradication Programme Supplement)

Developed by the PVS/PPR Specific Content Methods Task Group comprising: J Stratton, D Sherman, N LeBoucq, G Ferrari, J Soula, B Diop, and L Cameroun/C Loi (Secretariat), reviewed by S. Münstermann incorporating the experience of eight PVS/PPR specific content pilot missions undertaken during the period March 2017 to October 2019.

#### General

- An OIE PVS Evaluation (with PPR Global Eradication Programme Supplement) mission is an OIE PVS Evaluation mission that includes specific content or a dedicated focus on national PPR control and eradication.
- The OIE PVS Evaluation (or Follow Up) mission (PPR-specific) is reported on as a mission covering the entire veterinary domain and diseases.
- The PPR specific aspect is not the main focus of the mission report, which must be completed in the generic mission and report, which must be completed.

#### The OIE PVS Team and the PPR Specialist Role

- OIE PVS Evaluation (PPR-GEP) missions will generally include a PPR Specialist, the "PPR Specialist" to the standard mission team. The same as for a normal PVS Evaluation or Evaluation Follow Up, the lengths for previous PVS Evaluations can be referred to as normal.
- Where a country accepts to host an OIE PVS Evaluation (PPR-GEP) as designated by the OIE, will be responsible for leading aspects of the mission preparations, conduct and report. The PPR specialist will be responsible for leading aspects of the mission preparations, conduct and report. The generic whole-of-system PVS mission, this PPR specialist will be responsible for leading aspects of the mission preparations, conduct and report.
- The PPR Specialist will be supported by a "PPR secondary" nominated by the PVS Team Leader in consultation with the PPR Specialist.
- The involvement of the PPR Specialist and Secondary in assigning drafting of CCs, is still required, but should be given workloads, noting the PPR Specialist has primary responsibility. Experience has shown that the PPR Specialist can usefully focus on these elements of VS capacity.
- Other members of the PVS team, including the Team Leader on the mission as per a normal PVS Evaluation mission, are relevant to PPR are sought by the PPR specialist (e.g. PPR site visit the PPR specialist is unable to attend, or provision of annex). General contributions on the PPR element should be included in the mission report.

#### Mission Preparations and Conduct

## APPENDIX [X]

### Specific Content on Peste des Petits Ruminants (PPR) in relation to the PPR Global Eradication Programme<sup>1</sup>

#### Executive Summary

##### Introduction

The OIE has decided to offer PVS Evaluation or PVS Follow-Up Evaluation missions with specific content to its Member Countries, with the initial priority topic selected as PPR. This concept has received positive feedback from OIE Member Countries and key partners including at the OIE PVS Pathway Think Tank Forum of April 2017, and via many consultations since, including at the OIE General Sessions of 2017 and 2018, and at OIE Regional Commission Conferences around the world over this period.

This new approach aims at further enhancing the profile and impact of the PVS Pathway, as well as helping countries better manage their PPR control/eradication programmes via a systems approach. It also brings full consistency among OIE global high-level strategic priorities, including the declaration of PPR global eradication by 2030 supported by the adoption of the FAO-OIE Global Strategy for the Control and Eradication of PPR (GCES) in April 2015. The need to reinforce national Veterinary Services, in line with OIE standards on the quality of Veterinary Services, is an indispensable condition to the efficient and sustainable control of PPR and other small ruminant diseases, and this is well reflected in the GCES and the PPR Global Eradication Programme (PPR GEP), which serves as the first five-year implementation plan of the 15-year GCES.

The PVS/PPR specific content is based on 32 of the 45 Critical Competences in the PVS 7th edition which have been identified as particularly relevant to PPR control and eradication efforts (PPR-related CCs). These 32 PPR-related CCs are linked to different Stages of the GCES as shown in the table below. They also form part of the revised PMAT tool (PMAT 2). It is recommended to carry out a PMAT exercise during the PVS or PPR evaluation to complement and strengthen the evaluation.

CC relevant in PPR Stage 1 - Assessment (11)	CC relevant in PPR Stage 2 - Control (15)	CC relevant in PPR Stage 3 - Eradication (2)	CC relevant in PPR Stage 4 - Post-Eradication (4)
I.2.A; I.3; II.1.A; II.1.B; II.2; II.4.B; III.2; III.3; III.4; III.5.*; IV.1 A***,	I.1.A; I.1.B; I.2.B; I.5**; I.6.A; I.6.B; I.7; I.8; II.4.A; II.6; II.7.B; III.1; III.6; IV.1 B***; IV.6	II.1.C; II.12.A	I.9; II.3; II.5; IV.5

Following feedback from OIE members, partners and experts, the full integrity of the PVS Evaluation or Evaluation Follow-Up mission and report as reflecting a whole-of-system approach covering all aspects of the

## Recommendations

- *Countries should carry out PMAT exercises to show progression in the levels of achievement of PPR relevant critical competencies of the Veterinary Services;*
- *Requesting WOAHA for a PVS – PPR evaluation mission will enrich the mission team by a PPR expert and be a stimulus to the ongoing PPR activities and the staff carrying them out and will raise their importance within the Veterinary Services;*
- *Applying the PMAT with the available technical experts in-country should be an essential component of the PVS – PPR mission activities;*
- *Improving communication between those attending Regional Roadmap meetings and the national PPR team would lead to a better understanding of the regional context by the national PPR team.*

Recommendation

## Conclusions: PVS-PPR

- Benefits of the **whole-of-system approach** - system strengthening for greater sustainability
- Detailed **PPR-specific** recommendations – enabling environment, drivers/barriers for national strategies...
- **Raise the profile** of PPR as a key priority (voluntary focus of PPR)
- Complement **PMAT assessments**

❑ *Countries should be made aware that ultimately component 2 of the GCES, the performance of Veterinary Services, will need to be assessed and improved continuously in support of PPR control and eradication.*

## CONCLUSION

❑ *A PVS-PPR mission can assist in this endeavor and boost capacity towards PPR eradication and support **better implementation of the PPR National Strategic Plans.***

## PVS Reports

A major output of many PVS activities is a report containing rich data and insights, presenting an objective evaluation of the performance of the Veterinary Services, depending on a particular topic of interest. The findings are endorsed by the country and the report may be made publicly available depending on the country's preference.

PVS Reports are used to:

- Enhance Veterinary Services and public health by implementing its recommendations and improve Veterinary Services strength and capacity
- Capacity building performance and national level to address common challenges and achieve common goals
- Develop projects for capacity building initiatives to obtain financial resources and grants and measure progress and trends over time
- Justify advocacy and shape policy and strategy at the ministerial level to change legislation, policy and regulations
- Support internal auditing, quality management, and as a tool for inspections
- Increase vigilance and responding from partners and investors
- Aid in formation of these partners & agreements

The PVS Reports Repository can be used to easily access any PVS Report, according to the confidentiality status assigned to it and against several filters, such as region, country, level of advancement, and Critical Competency, among others. Additional documents will be added to the repository in the upcoming stages of the PVSIS development.

### Search and View

The PVS Document Repository contains all PVS Reports designated as Public/Global, Confidential and For Partners and Donors. In order to request a For Partners and Donors Confidential PVS Report, please use the **Request a Report**.

3. Interaction with interested parties: 806

4. Access to markets: 876

#### Count of Key Recommendations by Fundamental Component

1. Human, physical and financial resources: 32.34%

2. Technical authority and capacity: 38.71%

3. Interaction with interested parties: 13.50%

4. Access to markets: 14.61%

#### Ten most frequent Key Recommendations by Critical Competency

Veterinary Services Capacity and Resources: 41

Veterinary Services Strengthening: 29

Workforce Development and Capacity Building: 24

Veterinary Training and Workforce Development: 16

Vigilance y notificación de enfermedades: 10

Veterinary Services Communication and Collaboration: 8

Vigilance y control epidemiológico: 7

World Organisation for Animal Health Delegation: 3

### Data Extraction and Analysis

VCA aims to extract a maximum amount of insights from each PVS Evaluation Report (i.e. Evaluation, Performance, Specific Content, Aquatic Evaluation and Aquatic Performance). Given the significant effort put forward by its Members and PVSIS since 2007, the implementation of every PVSIS Technical Activity and the development of each PVS Report, this is only logical. We have developed a robust, scalable, and secure process to extract, process, and analyze all data from the strengths, weaknesses, and recommendations sections across Critical Competencies of each of the 100 PVSIS Evaluation Reports from 2007 to 2023.

Using the latest technology, similar phrases are matched together to extract and visualize insights and trends by stakeholders of the Veterinary Services. These insights will help Members to better understand the most common recommendations across Critical Competencies to promote actions and put better for the improvement of the performance of the Veterinary Services.

#### Concept/Theme Mapping

Our primary objective is to extract similar key phrases and themes from each Country's Country Report, including the critical competencies and recommendations of the country. Through this process, we identify similar themes and phrases and extract them into critical competencies, analyzing the development of indicators for more robust qualitative analysis. The systematic mapping of the most common themes for only enhance user comprehension but also expedite the extraction of meaningful insights from reports, providing a clear and concise understanding of the data trends, strengths, weaknesses and recommendations.

#### Results of Evaluation and General Recommendations

110,056

Qualitative Analysis Methodology: Text analysis using Natural Language Processing

Recommendation: Undertake a strategic review of future national veterinary needs considering the number of veterinarians, the role of the graduates, the migration of veterinarians and the role of veterinarians in the production.

Key Phrases: 

- Understand the role of veterinary services
- Consider the role of veterinarians
- Consider the role of veterinarians
- Consider the role of veterinarians
- Consider the role of veterinarians

### Data Confidentiality

In the development of the PVS Information System (PVSIS), VCA has been committed to the development of the PVSIS reports and data very carefully. Given the importance of the PVSIS, it is a priority to ensure that the data is secure and confidential. VCA has implemented a robust security framework to ensure the confidentiality of the data. This framework includes a variety of measures, such as data encryption, access control, and data backup. VCA has also implemented a data retention policy to ensure that the data is only kept for as long as it is needed. VCA has also implemented a data deletion policy to ensure that the data is deleted when it is no longer needed. VCA has also implemented a data archiving policy to ensure that the data is archived for future use. VCA has also implemented a data backup policy to ensure that the data is backed up regularly. VCA has also implemented a data recovery policy to ensure that the data can be recovered in the event of a disaster. VCA has also implemented a data security policy to ensure that the data is secure from unauthorized access. VCA has also implemented a data privacy policy to ensure that the data is used in a responsible and ethical manner. VCA has also implemented a data governance policy to ensure that the data is managed in a consistent and effective manner. VCA has also implemented a data quality policy to ensure that the data is accurate and reliable. VCA has also implemented a data integrity policy to ensure that the data is complete and consistent. VCA has also implemented a data availability policy to ensure that the data is accessible to authorized users. VCA has also implemented a data performance policy to ensure that the data is processed efficiently. VCA has also implemented a data cost policy to ensure that the data is managed in a cost-effective manner. VCA has also implemented a data risk policy to ensure that the data is managed in a way that minimizes the risk of loss or damage. VCA has also implemented a data compliance policy to ensure that the data is managed in a way that complies with applicable laws and regulations. VCA has also implemented a data security policy to ensure that the data is secure from unauthorized access. VCA has also implemented a data privacy policy to ensure that the data is used in a responsible and ethical manner. VCA has also implemented a data governance policy to ensure that the data is managed in a consistent and effective manner. VCA has also implemented a data quality policy to ensure that the data is accurate and reliable. VCA has also implemented a data integrity policy to ensure that the data is complete and consistent. VCA has also implemented a data availability policy to ensure that the data is accessible to authorized users. VCA has also implemented a data performance policy to ensure that the data is processed efficiently. VCA has also implemented a data cost policy to ensure that the data is managed in a cost-effective manner. VCA has also implemented a data risk policy to ensure that the data is managed in a way that minimizes the risk of loss or damage. VCA has also implemented a data compliance policy to ensure that the data is managed in a way that complies with applicable laws and regulations.

#### Trust, Engagement Preservation and Data Confidentiality Framework

Member's trust of handling of past data

VCA's Data Stewardship Focus on Insight Sharing

Added value of PVSIS to encourage engagement

Partner's need for insight
