Achievements and Perspectives: 4th Cycle Training Seminar
Focal Points for Veterinary Products – Middle East

Bierut, Lebanon
7-9 November 2017

National Focal Points Training Seminars

Veterinary Product-AMR

Achievements in Beirut :

- Successful interactive discussion on authorisation systems for veterinary medicines,
- Country information sharing
- Practical case studies, Working Group on AMR
- Commitment to provide answer to OIE questionnaire on Antimicrobial use (at least Baseline information)
- Focal points develop an appropriate stakeholder network in order to achieve data collection

National Focal Points Training Seminars

Veterinary Product-AMR

Main objectives of the 4th cycle Seminars:

- Quality of veterinary drugs - how to ensure the quality of veterinary medicinal product (VMP)
- Registration/authorisation of Veterinary Medicinal Products - VICH and VICH Outreach Forum
- **Antimicrobial use and resistance (AMR)**
- Antiparasitics and challenges

National Focal Points Training Seminars

Veterinary Product-AMR

Based on Resolution No. 38, adopted by 85th OIE World Assembly in May 2017:

- The OIE continue to organise training seminars at regional level for OIE National Focal Points for Veterinary Products (**5th cycle**), to improve awareness of its standards, guidelines and recommendations and the systems for improving the collection of data on the antimicrobial agents used in animals.

- Thank you for participating in the 4th Cycle Seminar – Middle East.
- I hope you enjoyed the sessions, and the opportunity to meet and discuss current issues with other Focal Points.
- To be continued in the 5th Cycle

Pilgrimage to Cedars of Lebanon is a picture of the Hungarian painter **Tivadar Csontváry Kosztka** of 1907
