• Technical Specification ISO TS 34700, Animal welfare management - General requirements and guidance for organizations in the food supply chain.

• Guiding documents; Animal welfare during transport

To support the implementation of the WOAH Chapters on animal transport (sea and land).

To be adapted (model) to the national or regional contexts.

Two documents:
- Emergency plan Model (land and sea transport)
- Check list models (land and sea transport)
When an unforeseen occurrence, such as an accident, malfunction of the truck or vessel, the closure of a road or the rejection of a consignment due to sanitary or other reasons occurs, a clear emergency plan should be part of the documentation accompanying the transport of animals.
Why?

To complement the WOAH standards but does not replace the recommendations provided in the Terrestrial Code. It aims to provide guidance as to what actions to consider when planning transport for animals.
Integration of WOAH activities regarding animal welfare during transport, through the GAWS pillars
